So you think education is a joke and you don't need it to succeed in life! Well, perhaps so, but lets look at the facts! What are the odds of you achieving success without an education? What does your competition look like? Lets say you are a recent high school drop out or you never completed high school, you've learned a few skills gaining hands on experience while working odd jobs and now you want to get a

job or advance in today's market. Lets examine the situation!

Many local colleges are breaking records with high enrollments for the years 2007 and 2008. Austin Community College (ACC), the eighth largest community college in the nation, is expecting a continual increase in the student enrollment because of their efforts to close the education gap and build a strong work force for the future.

Texas State University is next door and they're turning out thousands of students with degrees each year. And there you are with no degree or certification, barely able to pay rent and trying to compete against an army of qualified applicants.

So, what do you do? Think about what you want do with your life . . . then enroll in the Resident Self-Sufficiency program and get to work! Call 396-3367.
